LEXUS SAFETY SYSTEM-PLUS (LSS+)

True to innovative form, Lexus has raised its safety standards with Lexus Safety System+, an optional accessory package of automated driver-assist technologies. Introduced for select models in 2016, and available on each model by 2018/19, LSS+ helps protect against accidents by scanning for hazards and working to avoid them. With features like Pre-collision System,¹¹ Lane Departure Alert,¹² Automatic High Beam¹⁸ and Radar Cruise Control,⁴ the integrated system helps prevent or mitigate collisions, assist drivers to keep within their lane, and enhance road safety during night driving. Whatever the speed, LSS+ enhances driver awareness, decision-making, and vehicle operations to deliver a safer, more engaging driving experience. Visit lexus.ca for more details.

LEXUS SAFETY SYSTEM +

SURROUND YOURSELF WITH A SUPPORT SYSTEM.

Never before has the cutting edge been so safe. With Lexus Safety System+ now standard on all 2017 IS models, Lexus continues to set technological benchmarks by which all other sedans are measured.

TEN STANDARD AIRBAGS The comprehensive safety of the IS ensures every part of the cabin is covered, with side curtain and knee airbags for the driver and front seat passenger and rear outboard-seat side airbags.

AUTOMATIC HIGH BEAM¹⁸ Light your way as necessary, thanks to an in-vehicle camera sensor that assesses the brightness of streetlights, the lights of oncoming and preceding vehicles, and automatically turns the high beams on or off as conditions dictate.

LANE DEPARTURE ALERT¹² While your eyes are set on the road ahead, a camera works as a sensor to recognize lane markings around you, alerting when the vehicle deviates from its lane.

DYNAMIC RADAR CRUISE CONTROL⁴ & PRE-COLLISION SYSTEM¹¹

An advanced cruise control system maintains a constant speed and adjusts the vehicle's speed depending on the surrounding traffic. The Pre-collision System utilizes a millimeter-wave radar sensor to provide collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur.
