## LEXUS SAFETY SYSTEM-PLUS (LSS+)

True to innovative form, Lexus has raised its safety standards with Lexus Safety System+, an optional accessory package of automated driver-assist technologies. Introduced for select models in 2016, and available on each model by 2018/19, LSS+ helps protect against accidents by scanning for hazards and working to avoid them. With features like Pre-collision System,<sup>11</sup> Lane Departure Alert,<sup>12</sup> Automatic High Beam<sup>18</sup> and Radar Cruise Control,<sup>4</sup> the integrated system helps prevent or mitigate collisions, assist drivers to keep within their lane, and enhance road safety during night driving. Whatever the speed, LSS+ enhances driver awareness, decision-making, and vehicle operations to deliver a safer, more engaging driving experience. Visit [lexus.ca](http://lexus.ca) for more details.

LEXUS SAFETY SYSTEM +

## SURROUND YOURSELF WITH A SUPPORT SYSTEM.

Never before has the cutting edge been so safe. With Lexus Safety System+ now standard on all 2017 IS models, Lexus continues to set technological benchmarks by which all other sedans are measured.

**TEN STANDARD AIRBAGS** The comprehensive safety of the IS ensures every part of the cabin is covered, with side curtain and knee airbags for the driver and front seat passenger and rear outboard-seat side airbags.

**AUTOMATIC HIGH BEAM<sup>18</sup>** Light your way as necessary, thanks to an in-vehicle camera sensor that assesses the brightness of streetlights, the lights of oncoming and preceding vehicles, and automatically turns the high beams on or off as conditions dictate.

**LANE DEPARTURE ALERT<sup>12</sup>** While your eyes are set on the road ahead, a camera works as a sensor to recognize lane markings around you, alerting when the vehicle deviates from its lane.

**DYNAMIC RADAR CRUISE CONTROL<sup>4</sup> & PRE-COLLISION SYSTEM<sup>11</sup>** An advanced cruise control system maintains a constant speed and adjusts the vehicle's speed depending on the surrounding traffic. The Pre-collision System utilizes a millimeter-wave radar sensor to provide collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur.
